LASER DENTISTRY

The miracle we've been waiting for is here: **Solea®**.

Solea is a breakthrough dental laser that replaces the drill or scalpel for the vast majority of procedures in our practice. It's gentle, fast, and precise. Solea helps to eliminate the three major fears of going to the dentist – the drill, needle, and numbness. In fact, nearly every patient skips anesthesia because they just don't need it.

Solea is our way of keeping you happy. Because more than anything, we love to see you smile.

A ZERO-ANXIETY EXPERIENCE

- » No drill, needles, or numbness
- » Gentle, virtually pain-free treatments
- » Faster and fewer appointments
- » Rapid and predictable healing
- » Minimal post-operative discomfort

RAPID RELIEF FOR SNORING

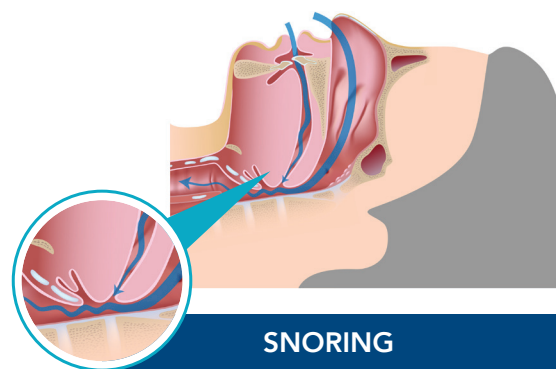

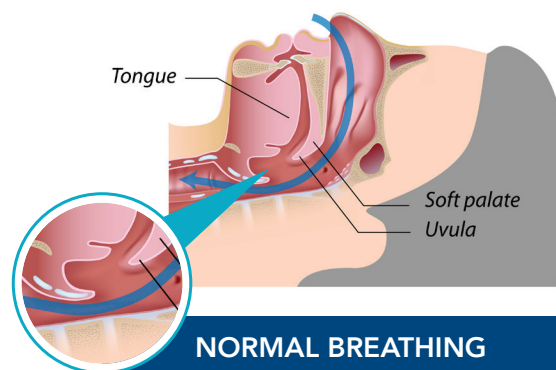

S O L E A
S L E E P

WHAT CAUSES SNORING?

The primary source of snoring is the vibrations that can occur when air flows past relaxed tissues in the soft palate. These tissues can become even more relaxed with age or weight gain.

of adults
that snore

67%

LASER THERAPY FOR SNORING

Solea Sleep uses ultra-low laser energy to tighten and stiffen collagen in the Lamina Propria layer of the soft palate, reducing vibrations that cause you to snore. This quick, non-surgical treatment should provide relief for a year or longer.

SOLEA® SLEEP

Solea® Sleep improves your quality of sleep by gently tightening tissue in your soft palate and reducing vibrations that cause you to snore. Unlike surgical procedures that require long and painful recoveries, Solea Sleep is a quick, comfortable, non-surgical procedure that is completed in a single visit. Enjoy rapid relief from snoring for you and your partner.
